
Magento 2 Web Developer // Project work job role

Are you an experienced Magento 2 developer looking for some work for Christmas? Click Creative is looking for the right person to fit right in to our focused, busy team working on major brand projects up to the end of the year.

We need someone ready to punch through an urgent eCommerce project
Like to know more?

About the role

Being part of a leading creative Digital Agency based in Collingwood, Melbourne, you'll be involved in interesting and diverse custom web design, development & eCommerce projects for our portfolio of high profile brand clients.

You'll be leveraging your extensive experience in a studio or freelance environment to hit the ground running and deliver our eCommerce development solutions with ease.

Work closely with our Studio team of designers and developers using your exceptional analytical and problem-solving skills to achieve your team project outcomes... is this your thing? Good!

About you

Not only do you have a passion for all things digital, but you also love developing all kinds of projects in your own time, too... we get that. So, it's easy for you to deliver Magento 2 development work to the highest standard.

It's your focus on database development, web application, and CMS module development along with platforms, languages, and frameworks that make you an essential asset in the rapidly expanding digital world... are you on board? Great!

And your ideal skillset

- At least 3 years' advanced Magento 2 experience and recent portfolio to suit.

So, if you're an all-rounder in the Studio and ready to work with others to succeed, let's chat soon... this role could be just what you're looking for. Naturally, your retainment is negotiable based on the experience & skills you bring to the table. Perfect!

All applications must include

- Cover letter
- CV outlining experience and skills
- Examples of previous work (Bit Bucket/PDF/URL).

To apply for this challenging role, address your application to our Creative Director, Darryn Thomas & complete our online application form.

[Recruiters please note, we appreciate your support when needed but we are not using outsourcing partners for this role – thank you!]
